[illegible]

[illegible]

Forward for the Chairman ······························ (1)

BASIC RESEARCH

Research on Current Estimation Method of Single-phase NPC Inverter Based on State Observer ·················· [illegible] (2)
Research on the Multi-factor Insulation Aging Characteristics of Insulating Paint Films under New Curing Processes ························ [illegible] (8)
Multi-objective Optimization of Flow Channel Structure and Operating Conditions for Air-cooled Fuel Cells ··· [illegible] (16)
Research and Establishment of A Method for Determining the Dissolution Rate of Limestone used in Wet Flue Gas Desulfurization ································ [illegible] (22)

DIGITAL MANUFACTURING

Test Bench Control System Based on Digital Cylinder Tube Valve ··· [illegible] (31)

THERMAL POWER

Study on Operating Characteristic with Back Pressure Change of the Ultra-supercritical Steam Turbine ·························· [illegible] (38)

HYDRAULIC POWER

A Processing Method for the Modification of the Cylindrical Valve of A Large-scale Hydraulic Turbine ··· [illegible] (44)

WIND POWER

Research on Testing Platform and Testing Method of Pitch System ·· [illegible] (49)
Design and Development of Fiber-optic Acceleration Sensors for Wind Turbine Blade Condition Monitoring ····················· [illegible] (54)

SOLAR POWER

Analysis of Risk Perception and Mitigation Technology Framework for Distributed PV Grid-connected Operation Under New Electricity System Development ······································ [illegible] (61)
Analysis of the Effect of Wind Speed on the Performance of the Concentrating and Collecting System in Tower Solar Thermal Power Plants ··· [illegible] (68)

ENGINEERING

Application Research of Laser Welding in Welding on Tubes and Tube Plates ···································· [illegible] (76)
A Design of A Straight-hanging Energy Storage System Based on High-voltage Cascade Technology ··············· [illegible] (80)
Energy Efficiency Analysis of High-voltage Permanent Magnet Synchronous Motor Applications in Water Supply Pump Stations ········ [illegible] (86)
